In Shanxi Province in China, Shenzhen Energy Group constructed a flywheel energy storage facility comprised of 120 high-speed magnetic levitation flywheel units, with a ...

A flywheel-storage power system uses a flywheel for grid energy storage, (see Flywheel energy storage) and can be a comparatively small storage facility with a peak power of up to 20 MW. It typically is used to stabilize to some degree power grids, to help them stay on the grid frequency, and to serve as a short-term compensation storage. Unlike common storage power plants, such as the
