What is a containerized concrete batch plant?

Containerized concrete batch plants, also called as the modular concrete mixing plant. It has advantages of fast installation and delivery, accurate measurement, strong adaptability, and convenient transition. It can meet various requirements of large and medium-sized construction projects such as high-speed rail and expressways.

Do containerized concrete batch plants need a foundation?

There is no special concrete foundation required, when installing containerized concrete batch plants. As long as the ground hardness and flatness meet the requirements, it can be installed. The modular concrete plant has a compact structure and saves floor space, and it also saves various costs such as manpower and time.
