-----

"By working hand-in-hand with PNCT and the city of Newark, our seaport is now home to a large solar energy project capable of generating significant energy for one of its ...

At the Port Newark Container Terminal in New Jersey, solar panels have been shoehorned into a tightly packed, high-traffic shipping facility, without disrupting operations or ...

The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the completion of one of the largest solar power ...

Completed in partnership with the Port Authority of New York and New Jersey and the City of Newark, the system was strategically built over active truck lanes, rooftops and ...

Learn how terminals are embracing renewable energy, highlighting solar, wind, electrification & grid resilience with LBCT.

The installation is one of the largest in-terminal renewable energy projects in the world and plays a major role in PNCT's plan to ...

The solar project consists of one roof-mounted and nine carport canopy solar photovoltaic (PV) arrays, allowing for significant solar generation without intruding on terminal operations.

The installation is one of the largest in-terminal renewable energy projects in the world and plays a major role in PNCT's plan to develop a net-zero emissions microgrid. It also ...

Standard Solar installed the project, which is made of rooftop installations and solar canopy systems to avoid
