ACCIONA Energia has installed the world's biggest irrigation system to be powered by a solar plant without batteries in Montesusin (Aragon, Spain).

Smart irrigation technologies are no longer futuristic concepts -- they are the foundation of sustainable farming in Spain today. In 2025, ...

Sense, place, technical need, and available information all conspire to render foldable solar boxes the end destination of Spain's energy transition--at increased profitability ...

Sense, place, technical need, and available information all conspire to render foldable solar boxes the end destination of Spain's ...

This is done by performing a benchmark study on the use of solar energy in six large irrigation systems--with different characteristics (size, crops, irrigation methods, capacity ...

Spanish startup Nomad Solar Energy and Full& fast have deployed a portable solar-plus-storage system at a Madrid farm to provide ...

Smart irrigation technologies are no longer futuristic concepts -- they are the foundation of sustainable farming in Spain today. In 2025, the focus is not only on producing ...

Spanish startup Nomad Solar Energy and Full& fast have deployed a portable solar-plus-storage system at a Madrid farm to provide off-grid power for irrigation.

This study explores the design and adaptation of a shipping container into a portable irrigation control station
