We offer two types of solar containers that differ in design and power output. Besides our flagship, auto-foldable container, we also offer the manual version of this unit.

We are actively driving the evolution towards emission and noise compliant power solutions at worksites. The mobile solar container range redefines on-site power by harnessing the sun's ...

These solar containers are designed to house all the necessary components for solar energy production and storage, offering a customizable, portable, and flexible energy solution.

Modular design of structure and components, according to different configurations, flexible for a variety of industrial and commercial scenarios such as microgrid, light storage and charging ...

Foldable power generation and energy storage warehouse is a containerised solar power solution. It combines the features of solar power generation and mobility to provide electricity around ...

These are tailor-made energy systems that combine solar power generation with battery storage, engineered specifically for the unique demands of each site. Highjoule delivers personalized ...

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

MOBIPOWER hybrid clean power containers combine battery energy storage systems with off-grid solar containers for remote industrial sites in Canada & USA.

This system is engineered for performance and durability. With 500KW of power and a massive 2150kWh of

storage, it ensures stable energy supply during peak usage or grid outages.

The H10GP-M-30K40 delivers 30kW of solar generation and 40kWh of storage, housed in a 10ft mobile foldable container. Using high-efficiency 480W panels, it's engineered for mid-size off ...
