What is the innovation cluster 5G Berlin?

The Innovation Cluster 5G BERLIN e.V. is a partnership of research and industry to promote joint projects and innovations around the new mobile communications standard 5G.

How does atesio contribute to 5G Berlin?

atesio contributes its expertise in radio and access network planning to 5G Berlin. On this basis, concrete, integrated network planning is possible as well as the development of new network planning and configuration methods (in the sense of SDN) to support the continuous, demand-oriented configuration of 5G networks.

What is a 5G non-profit association?

The objective of the non-profit association is both the testing of innovative 5G technologies and the development of new applications as well as interdisciplinary networking at the research and technology location Berlin.

The 5G-VICTORI Berlin facility extends the 5G connectivity towards the Berlin Central Station in support of three UCs. These UCs impose ...

The 5G Berlin facility is mainly concerned with providing the support for applications and vertical use cases embedding into a reference 5G networks environment composed of prototype 5G ...

In order to "crisis-proof" Berlin's communications infrastructure, the Gemeinsam Digital program has been piloting Kiezbox 2.0, which designs and installs battery- or solar ...
