What is ASEAN Power Grid?

The Association of Southeast Asian Nations (ASEAN) Power Grid is a major initiative designed to connect the electricity networks of ASEAN's 10 member countries, enabling fully integrated grid operation by 2045. ADB is working with development partners to establish dedicated financing solutions for the initiative.

Does ADB support the ASEAN Power Grid?

ADB is uniquely positioned to support the ASEAN Power Grid. The ASEAN power grid will improve energy security, strengthen resilience of the overall energy system, and promote the region's decarbonization. Delivering the ASEAN Power Grid is a complex, long-term task that requires strong and strategic partnerships.

When did ASEAN start regulating electricity?

In 1981, the first official discussions on the state of electricity grids within ASEAN began. This resulted in the creation of the "Heads of ASEAN Power Utilities/Authorities" group, otherwise known as HAPUA.

What is ASEAN Power Interconnection?

It envisions a network of cross-border power interconnections that enable electricity sharing between ASEAN countries, leveraging diverse energy sources, including renewables, to achieve cost-effective and resilient power systems.
