---

Made from widely available U.S. aluminum -- affordable, scalable, and secure. Built to perform safely, even under stress. Best in class energy efficiency -- setting a ...

The aluminum-CO<sub>2</sub> battery can store and discharge twice the amount of energy that a lithium-ion battery of the same weight and size ...

Zenthos Energy is pioneering next-generation energy storage with high-performance, rechargeable Aluminum-CO<sub>2</sub> batteries. Their ...

A new startup company is working to develop aluminum-based, low-cost energy storage systems for electric vehicles and microgrids. Founded by University of New Mexico ...

Aqueous aluminum-based energy storage system is regarded as one of the most attractive post-lithium battery technologies due to the possibility of achieving high energy ...

The aluminum-CO<sub>2</sub> battery can store and discharge twice the amount of energy that a lithium-ion battery of the same weight and size can, according to lab testing conducted by ...

Flow Aluminum, an Albuquerque-based startup innovating the energy sector with its groundbreaking aluminum-CO<sub>2</sub> battery technology, ...

Through its advanced, aluminum-based energy-storage technologies, Flow Aluminum strives to optimize energy consumption, reduce costs, and enhance overall ...

Flow Aluminum, an Albuquerque-based startup innovating the energy sector with its groundbreaking aluminum-CO<sub>2</sub> battery technology, today announced a significant milestone in ...

New Mexico-based Flow Aluminum, Inc. has developed a groundbreaking high-performance battery technology: a revolutionary innovation that not only surpasses traditional ...

Flow Aluminum Inc., founded 2023 in Albuquerque, New Mexico, develops advanced aluminum-CO<sub>2</sub> battery technology to transform energy storage with sustainable, high-performance, non ...

Albuquerque-based aluminum-carbon (Al-CO<sub>2</sub>) battery developer Flow Aluminum has demonstrated a full discharge and half-charge cycle in a pouch cell based on its "metal ...
