According to IPTO data, curtailments reached 228 GWh in 2023, soared to 900 GWh in 2024, and already hit 975 GWh in the first five months of 2025. The total for the year is ...

Athens, the cradle of Western civilization, now racing to become Europe's energy storage trailblazer. The Athens grid energy storage system isn't just another infrastructure ...

Well, here's the kicker - Athens is now turning that relentless sunshine into a 24/7 power source through cutting-edge energy storage. With solar curtailment hitting 515 GWh this July alone ...

With a total installed capacity of 680 MW (production) and 730 MW (pumping), Athens-headquartered Terna Energy says the Amphilochia pumped storage project will be Greece's ...

With increasing climate uncertainties and rising energy demands, Athens faces a critical challenge: ensuring uninterrupted power supply during emergencies. The city's infrastructure ...

To access additional data, including an interactive map of gas-fired power stations, a downloadable dataset, and summary data, please visit the Global Oil and Gas Plant Tracker ...

ATHENS, June 9 (Reuters) - Greece plans to invite investors to build batteries for renewable energy power, with a total storage capacity of 700 megawatt, later this year, the energy...

BESS offers grid operators on-demand power that can respond quickly when needed. In addition, BESS makes it possible to save extra solar power generated during the day and release it ...

Imagine storing summer solar energy for winter heating - that's the holy grail Athens' engineers are chasing.
