-----  
What is Massachusetts' energy storage procurement?

The energy storage procurement aligns with Massachusetts' 2024 legislation, An Act Promoting a Clean Energy Grid, Advancing Equity and Protecting Ratepayers, which directs the state to procure energy storage totaling 5 GW by July 31, 2030. The procurement targets 3.5 GW of mid-duration storage (four to ten hours), totaling 14,000 to 35,000 MWh.

When will long-term contracts for energy storage projects be released?

The exact release date for the Long-Term Contracts for Energy Storage Projects remains "TBD," though a tentative schedule in the draft suggests a public release of the RFP on July 31, 2025. The RFP includes scheduled periods for questions and feedback through the fall, with proposal submissions due by Sept. 10.

Will Massachusetts get 5 GW of energy storage by 2030?

Massachusetts is initiating efforts toward its 2024 goal of procuring 5 GW of energy storage by 2030. A draft request for proposals (RFP) for 1.5 GW of 4- to 10-hour energy storage resources has been released. This initial RFP follows the state's 2024 legislation mandating the procurement of 5 GW of storage capacity by 2030.

What is the energy storage system agreement (ISC)?

Energy storage systems, bridging the gap between wholesale market revenues and the project's revenue requirements. The ISC agreement incentivizes developers to build and operate energy storage systems consistent with the existing market framework and mechanisms of the wholesale market of PJM and MISO. The focus of the ISC a

The stakeholder questions below are intended to guide the RFP Drafting Parties in navigating these often-competing considerations. Both types of energy storage systems play a ...

An overview of Energy Storage Targets across 50 U.S. States, with state-by-state policy progress, key resources, and model rules.

In evaluating the appropriate contract structures for the initial procurement of utility-scale energy storage

resources, stakeholders provided insights on two primary mechanisms: indexed ...

FEMP also supports federal agencies with energy procurement, specifically off-site energy procurement options. FEMP provides resources and assistance to federal agencies based on ...

Massachusetts is seeking the environmental benefits associated with long-term contracts for mid-duration energy storage systems, which include ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), ...

Determine the types of storage to be considered. Grid carbon content varies throughout the day. Grid carbon content varies by region. Make and store chilled water (or ice) in tanks when ...

CESA members--mostly state agencies-- include many of the most innovative, successful, and influential public funders of clean energy initiatives in the country.

A draft request for proposals (RFP) for 1.5 GW of 4- to 10-hour energy storage resources has been released. This initial RFP follows the ...

Massachusetts is seeking the environmental benefits associated with long-term contracts for mid-duration energy storage systems, which include those that can store energy and dispatch it at...
