What is a Bess container?

The Eldapoint Group BESS containers range is custom-designed to provide highly efficient housings for renewables. Built to satisfy the most demanding environments and LPCB requirements, we specialise in Lithium-ion battery enclosures. Our BESS range offers three sizes to cater to diverse requirements.

What is a Bess battery system?

BESS ( battery energy storage system) or battery containers are most commonly built using converted shipping containers. Primarily used to store power generated by renewable energy sources such as wind and solar, BESS battery systems are key to global carbon reduction.

How many kWh can a Bess system store?

These BESS systems are normally manufactured either as single 200kwh units or in 20ft Containers which can store 1000kwh/500kw output. The units come complete with DC- AC inverters Air cooling and Fire suppression. Constant output on 1000kwh units are 500kw.

What is Bess & how does it work?

One key application is for load shifting on-site generation, charging the battery from surplus solar or wind energy and discharging it later in the day to reduce grid import. Moreover, BESS is often used for peak shaving - reducing power usage during peak demand times to lower energy costs.

We supply all materials and equipment required. We assemble and install the BESS with integration of electrical, mechanical or other technical ...

We supply all materials and equipment required. We assemble and install the BESS with integration of electrical, mechanical or other technical systems. We test and commission along ...
