What is the daily refining capacity of BAPCO?

Bapco refines more than 267,000 barrels of crude oil per day. More than one-sixth of this capacity comes from the Bahrain Field.

How will Technip energies improve Bapco's Refinery capacity?

The new facility will also include a residual hydrocracking unit of 65 MBPD, a VGO hydrocracking unit of 58 MBPD and two hydrogen units of 125 MMSCFPD each. Technip Energies is providing advanced technologies to improve the capacity and efficiency of Bapco's Bahrain refinery. This complex project has presented several challenges.

Will Bapco Refinery expand?

The refinery expansion will boost the plant's ultra-low sulphur diesel production by 72% and jet fuel production by 90%, its company website showed. Also, the refinery is expected to produce more naphtha, van Veldhoven said. On the feedstock front, Bapco Energies still plans to import heavier crude for the expanded plant.

Where is Bahrain Petroleum Co (BAPCO) located?

Residents are seen doing their evening walk near the petroleum pipelines as State-run Bahrain Petroleum Co (Bapco) refinery is seen at the back, in Ma'ameer village, south of Manama, Bahrain, August 22, 2017. REUTERS/Hamad I Mohammed/File Photo Purchase Licensing Rights
