---

In a matter of months, Bulgaria"s total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic ...

The Ministry of Energy of the Republic of Bulgaria has announced two requests for proposals for tender participation to support ...

The Bulgarian solar energy sector is witnessing a remarkable transformation as the country"s solar power capacity surges past expectations, with the biggest photovoltaic parks ...

The Ministry of Energy of the Republic of Bulgaria has announced two requests for proposals for tender participation to support new renewable electricity generation and energy ...

This assumes that, if renewable power did not exist, fossil fuels would be used in its place to generate the same amount of power and using the same mix of fossil fuels.

A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold for $0.30/ kWh in a fixed rate 20 year power purchase agreement.

Solar power generated 12% of Bulgaria"s electricity in 2023. It has been estimated that there is potential for at least another 4 GW by 2030. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity ...

The Verila facility, under construction in hilly terrain south of Sofia, is set to increase solar power generation in Bulgaria by up to 12%. Works on the photovoltaic plant, developed by Eurohold, ...

Bulgaria"s energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past year, ...

This report provides an in-depth look at the market for distributed solar PV for both households and businesses (i.e. residential and commercial prosumers) in Bulgaria.

Moreover, estimates from the Bulgarian Association for Production, Storage, and Trading of Electricity (APSTE) indicate that Bulgaria has tripled its installed solar capacity ...

In conclusion, despite occasional adverse weather conditions that may affect solar power generation efficiency in Sofia, its geographical position within the Northern Temperate Zone ...
