-----

A high share of solar and wind power indicates significant progress in decarbonization, but excessive curtailment--where renewable electricity is wasted due to grid constraints or ...

Achieving the 1 GW target for new solar capacity on the grid in 2023 and bringing the total PV fleet close to 3 GW puts Bulgaria on track to fulfill its 3.2 GW NECP targets for ...

Solar power generated 12% of Bulgaria's electricity in 2023. It has been estimated that there is potential for at least another 4 GW by 2030. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity ...

The scheme, introduced in 2023, is for power plants in areas where the network requires reconstruction or expansion. Some of the units get only part of the full capacity online.

Solar power in Bulgaria was expanded by 100 megawatts (MW) in 2011. A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold ...

The Bulgarian solar energy sector is witnessing a remarkable transformation as the country's solar power capacity surges past expectations, with the biggest photovoltaic parks ...

Are you looking for information on renewable energy in Bulgaria? In this CMS Expert Guide, we tell you everything about it.

The power plant is on track to become operational early next year. A 123 MW system will be on 400 hectares between the villages of Knizhovnik and Dolno Vojvodino in ...

Recent legislative changes in Bulgaria aim to facilitate the permitting process for solar power plants. The

report provides a complete picture of the market situation, dynamics, current ...

This guide explores system types, government incentives, and cost-saving strategies while highlighting the latest industry trends. Whether you're planning a rooftop installation or a utility ...

Bulgaria's government outlines plans for renewable energy, yet lacks concrete strategies for rooftop solar installations despite the country's high solar potential. While a draft strategy ...
