Is Cambodia ready for 5G?

Cambodia is well on the way on preparing for the rollout of 5G services. Cambodia has entered into a deal with Huawei to roll out 5G mobile infrastructure. Cambodia's mobile broadband has grown sharply over the past five years from a small base driven by a mature mobile market.

Why is Cambodia integrating 5G into the telecommunications sector?

This move is part of the country's broader strategy to enhance digital government, businesses, and citizen engagement. The Ministry of Posts and Telecommunications (MPTC) is working on integrating 5G into Cambodia's telecommunications sector, focusing on expanding bandwidth and network coverage to meet the growing demand for high-speed internet.

Is 5G a long-term solution for Cambodia's digital future?

Additionally, long-term initiatives, such as undersea internet connections, are already in the works. At a recent conference summarizing Cambodia's digital progress from 2020 to 2024, Cheang Sopheak, the director-general of MPTC's Directorate General of Radio Frequency Spectrum Management, discussed the transformative potential of 5G.

What is the current status of telecommunication in Cambodia?

1. Current status of Telecommunication in Cambodia 1. Current status of Telecommunication in Cambodia 1. Current status of Telecommunication in Cambodia Still in low demand for both individual consumer and industrial enterprise. Users are not willing to pay for the service at higher price.
