ITP Renewables was engaged by Eku Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin powering one-third of Canberra households ...

The Australian Capital Territory government has officially switched on its first grid-scale battery energy storage system, describing it as a "significant milestone" on Canberra's pathway to 100% renewable electricity supply.

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for two hours during peak demand, helping to provide long ...

The Big Canberra Battery has inched a step closer to being built, with the ACT government announcing it will partner with Eku Energy to deliver the mass-energy storage device.

The 250-megawatt (MW), 500 megawatt-hour (MWh) battery energy storage system will join the Big Canberra Battery project. It will store enough renewable energy to power one-third of ...

ITP Renewables was engaged by Eku Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin ...

The BESS will store energy generated during times of surplus renewable generation and off-peak times, helping to manage Canberra's peak load by injecting power back to the grid when it is ...

Canberra is taking bold steps towards a sustainable future, with recent initiatives set to transform how we generate, store, and use energy. Here's what you, as a Canberra resident, need to ...

The large-scale 250 megawatts (MW) battery will store enough renewable energy to power one-third of the city of Canberra for two hours during peak demand, helping to provide long-term energy security for the region.

This 250-megawatt (MW), 500 megawatt-hour (MWh) battery energy storage system (BESS) is part of the Big Canberra Battery project and can store enough renewable energy to power one-third of ...

Designed to tackle the intermittency of wind and solar power, this pumped hydro initiative could store enough electricity to power 200,000 homes for 8 hours--equivalent to keeping Sydney Opera House ...

The grid-scale battery will deliver 250MW of storage, support grid reliability and help to integrate greater amounts of renewable generation. Approximately 180-200 jobs will be created ...
