---

This transformative project is a powerful example of how renewable energy can drive positive change, setting a compelling precedent for other nations with similar goals. ...

The project, considered the world's largest solar-storage project, will install 3.5GW of solar photovoltaic capacity and a 4.5GWh battery storage system. The project has commenced in ...

Cape Verde is moving toward a cleaner energy future by expanding its wind capacity by 13.5 megawatts and adding 26 megawatt-hours of grid-connected battery storage.

Without robust storage, even cutting-edge solar farms become...well, decorative. That's why recent advancements in battery tech and smart grid systems are rewriting Cape Verde's ...

The Santiago Pumped Storage Project, which will be located in Cha Goncalves, in the municipality of Ribeira Grande de Santiago and ...

The Santiago Pumped Storage Project, which will be located in Cha Goncalves, in the municipality of Ribeira Grande de Santiago and will cost around 60 million euros, promises ...

South Africa's electricity minister has said the largest solar-plus-storage project, with a combined solar generation capacity of 540MW, and 225MW/1,140MWh of battery energy storage system ...

This article explores how the archipelago is overcoming energy challenges through innovative storage solutions, with insights on technology, economic impact, and lessons for island nations ...

A new solar project is expected to increase the penetration of renewable energy on Cape Verde to more than 40%.

The Cape Verdean government's Special Projects Management Unit (UGPE) has launched a tender for the construction of four solar photovoltaic power plants on four different islands in ...

Imagine turning 9MW of wind power into 22MW while adding enough storage to light up a small city. That's exactly what's happening on Santiago Island with a EUR50 million ...
