What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.

What is solar-plus for Electric Co-ops?

Solar-Plus for Electric Co-ops (SPECs) was launched to help optimize the planning, procurement, and operations of battery storage and solar-plus-storage for electric cooperatives. SPECs was selected by the U.S. Department of Energy's National Renewable Energy Laboratory (NREL) for Round 2 of the Solar Energy Innovation Network (SEIN).

What are the challenges of procurement for utility-side storage & solar-plus projects?

The challenges of procurement for utility-side storage and solar-plus projects center largely on early-stage decisions: defining the top-priority use case, but also exploring ways to get more value out of the project and to prepare for market changes over its life.

How does an EPC contract work for energy storage projects?

When developing an energy storage project, a project owner can engage an EPC contractor to provide a fully-wrapped EPC agreement that will encompass the procurement, installation, and commissioning of batteries. In many cases, however, owners will contract directly with battery suppliers for battery supply and commissioning.

On this page, SPECs offers a process framework for solar-plus-storage procurement, as an essential checklist for process steps and considerations. A procurement guidance brief, tuned ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), ...

SAN FRANCISCO - The California Public Utilities Commission (CPUC) today established an innovative

centralized procurement strategy aimed at boosting the state's clean ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges still loom on the horizon--tariffs, shifting ...

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

But behind every high-performing solar array or energy storage system, there's a procurement team that made it possible. At our company, smart procurement is about ...

Solar-Plus for Electric Co-ops (SPECs) was launched to help optimize the planning, procurement, and operations of battery storage and solar-plus-storage for electric cooperatives.

On this page, SPECs offers a process framework for solar-plus-storage procurement, as an essential checklist for process steps and ...

Ever wondered why utilities and corporations are scrambling to master distributed energy storage procurement? From megawatt-scale projects in China's innovation hubs like Xiong'an to bite ...

Access the definitive 2026 guide for corporate photovoltaic and energy storage procurement. Learn strategic frameworks to avoid common financial and technical pitfalls while ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges ...

The Federal Energy Management Program's (FEMP) Distributed Energy and Energy Procurement initiative helps federal agencies accomplish their missions through investment in lasting and ...
