Where can I find a solar inverter?

Browse solar inverters from top manufacturers on the EnergySage Buyer's Guide. To learn about other solar energy system components, visit EnergySage's solar panel and solar battery buyer's guides. Solar inverters are an essential component in any residential, commercial, or utility-scale solar energy system.

Does solar inverter price matter?

As solar energy adoption accelerates worldwide, the solar inverter price remains a key factor in determining the affordability and performance of residential and commercial solar systems. This article offers a detailed market overview, real-world pricing insights, and a comparison of leading solar inverter brands and their most popular models.

How much does an inverter cost?

Medium Residential Systems (6-10 kW): You'll likely need an inverter between 6 and 10 kW, with costs between \$1,800 and \$3,500. Large Residential/Small Commercial Systems (10+kW): These require inverters 10 kW and above, with prices starting around \$3,000 and going up significantly depending on the specific application.

How much does a grid-tied inverter cost?

A grid-tied inverter for a residential system costs between \$1000 and \$3000. These inverters are designed for systems connected to the utility grid that do not require batteries. They work by synchronizing the solar power output with the grid, and the excess power can be sold. Because they depend on the grid, there's no backup power during outages.
