-----

The Chilean Ministry of Energy has laid out a precise and ambitious regulatory agenda for 2026, designed to modernize the grid, integrate distributed resources, and solidify ...

The study tracked 954 MW of operational energy storage capacity by the end of March, 48% of the national goal of hitting 2 GW by 2030. The ministry report included details ...

Through the deployment of cutting edge battery storage technology, Fluence is not only addressing the technical challenges of Chile's energy transition but also contributing to the ...

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the ...

Hybrid solar and battery storage systems are now bankable for 24/7 industrial power, accelerating the displacement of fossil fuels. A major hybrid solar and battery storage ...

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity ...

According to the report, Chile will be the first South American country to hit competitive battery storage pricing within the next decade. The combined integration of ...

If you're in the energy storage game, Chile's 2025 tender announcement is like spotting a rare bird in the Atacama Desert--exciting and packed with potential.

Energy storage drivers in Chile include curtailment and attractive differences between daytime and nighttime

prices, along with industrial demand for clean power around ...

Are battery energy storage systems a viable alternative for Chilean power producers? With transmission lines at overcapacity and permitting delays slowing the development of new grid ...
