---

A major green energy investor will bring some of the world's most powerful batteries, which could run for twice as long as today's biggest systems, to Australia.

Chinese solar manufacturer JinkoSolar has submitted plans for a 600MW solar-plus-storage project in Queensland, Australia, to the federal government. The Beebo Solar ...

As Australia races toward net-zero targets, energy storage has emerged as the linchpin of a reliable, renewable-powered grid. Among the global leaders in battery energy ...

Chinese battery and energy-storage companies are significantly increasing their footprint in Australia, securing supply agreements totalling nearly ten gigawatt-hours and ...

Its battery storage solutions are highly favored by Australian households, renowned for modular design, flexible scalability, and advanced intelligence, securing a ...

There is huge potential for enhanced Australia-China collaboration in areas of mutual interest, including solar R& D (UNSW and JA Solar joint lab), green iron (Fortescue and ...

This solar and battery storage makes it a good deal for both home and business establishments in the Australia to invest on low-cost solar panels and batteries from China.

Chinese solar developer Jinko Power has filed an application with the Australian government for a 600 MW solar array and 800 MWh ...

Chinese solar developer Jinko Power has filed an application with the Australian government for a 600 MW solar array and 800 MWh battery energy storage project in the state ...

China solar giant proposes huge solar and battery hybrid project, designed to tap into a new wave of industrial and electrification loads on Australia's western grid.

A major green energy investor will bring some of the world's most powerful batteries, which could run for twice as long as today's ...

The main issue will be using such batteries in a grid-tied set up - the regulations/requirements for that are pretty stringent. Usually such batteries are used for off ...
