How do you conceal solar panels on a roof?

Solar energy is becoming more and more popular, but if you're not comfortable with the look of traditional solar panels, you may wonder how to conceal them. To conceal solar panels on your roof, you could use all-black solar panels or aluminum coverings that match the color of your roof.

Are solar panels a real concealer?

Some types of solar panels can act as real concealers. For example, building-integrated photovoltaics (BIPV) look like roofs and windows in your home. Some solar panels will look exactly like shingles and will be hard for anyone passing by to notice.

How can solar panels be hidden?

The most technologically advanced method of hiding solar panels is building integrated photovoltaics (BIPV). Instead of concentrating all PV cells on the roof, BIPV strategically adds PV technology to all aspects of the home's exterior, including the roof, facade, and windows.

How can you hide a solar panel installation?

Surround Them With Foliage is a simple way to hide a traditional solar panel installation. Plant trees in strategic areas around your property to block them from view without altering your home.

Find out how you can camouflage solar panels without compromising performance. Schedule a free solar design consultation with SouthFace Solar & Electric today!

Designers, architects, and energy planners are gradually realizing the potential of hidden solar systems that align with local regulations while addressing space constraints.
