---

It consists of two gas turbines by General Electric combined with one steam turbogenerator. The capacity of this unit reaches 220 MW. The unit came online using diesel fuel as a stopgap until ...

A tender process with the aim of installing two new generators at the Dhekelia power station has begun, Energy Minister George ...

The Dhekelia Power Station, located approximately 15 kilometers east of Larnaca, is one of three power plants operated by the Electricity Authority of Cyprus (EAC).

The Cyprus Electricity Authority (EAC) is set to evaluate three bids for new diesel generators at its Dhekelia power plant, with proposals ranging from 107 to 148 million euros, ...

The original plant was the first of the company, which started building it in the mid-1950s. Completed, it consisted of seven steam turbo generators with a total capacity of 84 MW.

Located on the south-eastern coast of Cyprus, Dhekelia Power Station, with an installed capacity of 460 MW, generates about 34,5% of the total generation produced by the Authority's Power ...

Since Cyprus has no primary sources of energy, the Electricity Authority of Cyprus (EAC) depends entirely on imported fuel, mainly heavy fuel oil, for electricity generation.

The board of directors of the Electricity Authority of Cyprus (EAC) determined during a marathon session last night that the installation of new generators at the Dhekelia ...

Cyprus is set to expand its energy infrastructure with new storage facilities and power generators, Giorgos

Petrou, president of the Cyprus energy regulatory authority (Cera) ...

The original plant was the first of the company, which started building it in the mid-1950s. Completed, it consisted of seven steam turbo generators with a total capacity of 84 MW. As the machinery grew old and demand rose steadily, a new plant was built next to the old. Built in five phases, the current power plant consists of six steam turbines, each of a capacity of 60 MW and six diesel engines of approximately 17 MW each. All boilers burn heavy fuel oil and were ...

A tender process with the aim of installing two new generators at the Dhekelia power station has begun, Energy Minister George Papanastasiou said on Friday.

Moni power station, which is used as backup, is located on the south coast of Cyprus, to the east of Limassol and consists of 4x37.5MWe gas turbines. The steam units at Vasilikos are used ...
