What is 5G & how does it work in Israel?

The fifth generation of cellular networks, 5G, officially launched in Israel on Tuesday. It offers customers faster browsing speeds on their smartphones - if they can connect to it. Following some setbacks over tenders and upgrades, the network officially launched across the country.

How many 5G sites are there in Israel?

The first offers 500 gigabytes of Internet surfing for NIS 60 per month for five years. The second offers a terabyte (1,000 GB) for NIS 70 per month for five years. Together, the providers say they have installed 250 5G sites throughout Israel, with more being added regularly.

Does 5G affect EMF levels in Israel?

Within the context of 5G development in Israel, the Ministry of Communications has analysed the recommendations on the relationship between the network and EMF levels and announced that it will act, if necessary, to ensure the rollout of 5G networks in the country while maintaining standards of public health.

How many companies are working on 5G in Israel?

In terms of market development, local press reported that there are currently about 25 Israeli companies working on 5G-related technologies, ranging from transnational firms as large as Intel to small early-stage start-ups such as TetaVi Ltd. and Binah AI Ltd. From health care to autonomous traffic management and 5.

In July 2020, Partner announced the establishment of its 5G network, known as the "Partner 5G project," which positions the operator as the first private stakeholder to launch 5G in Israel.

Cellcom and Parallel Wireless have announced the launch of their first-of-a-kind pilot, which is going to demonstrate the deployment of autonomous 5G SA core sites in Israel.
