Imagine a battery so massive it could power Dubai's Burj Khalifa for 72 hours straight. That's the scale of the Middle East's largest energy storage project, currently under ...

The project marks the debut of cost-effective, large scale, utility wind power on the UAE's electricity grid, diversifying the country's energy mix and advancing its energy transition.

Across events, construction, and logistics, organizations in the UAE are prioritizing power solutions that are efficient, low-impact, and simple to deploy. Mobile battery energy storage ...

AstralENERGY(TM) specializes in the design, development, construction and operation of long-term viable baseload energy created from renewable and sustainable sources incorporating energy ...

Dubai is taking the lead in the shift to renewable energy, focusing on wind and solar power. Learn about its ambitious goals, major projects, and sustainable future.

The pumped storage facility will contribute to the Dubai Clean Energy Strategy 2050, which aims to increase the share of renewables in the city's total power generation capacity to 75% by 2050.

AstralENERGY(TM) specializes in the design, development, construction and operation of long-term viable baseload energy created from renewable ...

Based on field visits and available preliminary data on wind in Hatta, Dubai Electricity and Water Authority (DEWA) has identified the location for a wind farm with a total ...

Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage

advancements set for 2025. Read more here.

Each of the mobile energy centres included a 45kW wind turbine, a trailered 3.6kW solar system and 120kW battery storage system (BESS). The ...

The 103.5-megawatt (MW) landmark project will introduce cost-effective, large-scale, utility wind power to the UAE's electricity grid, further diversifying the country's energy mix and advancing ...

Each of the mobile energy centres included a 45kW wind turbine, a trailered 3.6kW solar system and 120kW battery storage system (BESS). The project was delivered within 12 weeks thanks ...
