---

The new solar plant will significantly increase Serbia's non-hydro renewable capacity, reducing the country's reliance on fossil fuels ...

The 10 MW Petka power plant is the first solar site to be operated by state-owned utility Elektroprivreda Srbije.

The first solar park of Elektroprivreda Srbije (EPS), named "Petka", located in Kostolac, is expected to be connected to the grid within the first quarter of 2025, announced ...

Serbia's state power utility, Elektroprivreda Srbije (EPS), has invited bids for producing a preliminary feasibility study and a conceptual design for a solar power plant on the ...

Domi Eko Solar has started to produce photovoltaic panels in its plant near Velika Plana in central Serbia. This is the first solar panel production unit in the country.

The installation of solar panels is currently underway at the Petka solar power plant, located on an 11.6-hectare site. Once completed, the plant will have an installed ...

The new solar plant will significantly increase Serbia's non-hydro renewable capacity, reducing the country's reliance on fossil fuels and decreasing greenhouse gas ...

Meta Description: Explore how Belgrade's solar photovoltaic panels field positions Serbia as renewable energy leader. Discover project benefits, industry data, and why EK SOLAR ...

In a resolute stride towards greener energy horizons, Serbia's state-owned power utility, Elektroprivreda Srbije (EPS), is gearing up to kickstart the construction of its inaugural ...

Meta Description: Explore Serbia's photovoltaic power generation potential, including solar irradiance data, policy incentives, and market trends. Learn how EK SOLAR supports ...

According to experts, the trend of growing interest in investments in solar power plants in the Republic of Serbia will continue in 2024. In this text, we investigate costs, duration, and legal ...
