What is the Timor-Leste solar power project?

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy storage system. This will be the country's first full-scale renewable energy IPP project.

Why should Timor-Leste invest in solar & storage infrastructure?

José added: "The investment in Timor-Leste's solar and storage infrastructure is transformative. It will help reduce dependence on fossil fuels while improving grid stability and energy access across the country". José de Ponte was supported by special counsel Marnie Calli, senior associate Lisa Huynh and solicitor Jeraldine Mow.

How much electricity does East Timorese use?

In 2022, its electricity consumption was 414.76 million kilowatt-hours. Imported fossil fuels are the primary source of energy for the country, but access to this energy is highly uneven. A majority of East Timorese live in rugged mountainous areas, and only 5 percent of these households are connected to the electricity grid.

Does East Timor need a national energy sector?

Since attaining full independence from Indonesia in 2002, East Timor has struggled to rebuild its war-damaged infrastructure, of which that supporting its national energy sector is key.

What is the Timor-Leste solar power project? The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power ...

Four companies--Woodside Energy (Australia), ConocoPhillips (United States), Royal Dutch Shell (Netherlands), and Osaka Gas (Japan)--partnered to commercialize these vast reserves and ...

We specialize in solar energy storage solutions, energy storage battery systems, microgrid development, and photovoltaic power generation projects.
