With a total land area of 93 hectares and 63 megawatts of capacity, the solar plant will generate enough renewable energy to power approximately 13,000 homes. We explore ...

Discover Auckland's sustainability initiatives, from renewable energy to waste reduction, and how solar power supports the city's journey to net zero emissions.

A significant step has been taken for renewable energy in New Zealand with the approval of the 179 MW Auckland Solar-Plus-Storage project. An independent panel has given ...

Solar power is increasingly important to New Zealand as it provides a low-cost clean, renewable energy source. However, intermittent generation like solar and wind must be ...

In New Zealand, several community solar initiatives are currently in operation, showcasing the potential for collaborative investment in solar energy. These projects can ...
