That's where large-capacity energy storage in substations comes in - think of it as a giant "pause button" for electricity. These systems are becoming the unsung heroes of ...

The Fox Hills energy storage system, which is located next to our substation in the Rosebank neighborhood of Staten Island, furthers our clean-energy goals by storing 7.5 MW / 30 MWh of ...

A substation energy storage system (ESS) is a grid-side solution deployed at or adjacent to electrical substations to enhance power quality, improve load management, and ...

Implementing energy storage in substations constitutes a significant advancement within the energy landscape that necessitates careful consideration of multiple elements, from ...

New York has opened its first state-owned utility-scale energy storage facility. Located in Chateaugay, Franklin County, the 20-megawatt facility will be operated by the New ...

The geniuses who are planning New York's energy future think that they can make intermittent wind and solar generators work to power the electrical grid by the simple device of ...

Nexamp, together with National Grid, is addressing increased energy demand at the Coffeen substation in Watertown, New York with the construction of a new solar + storage facility.

The 20 MW Northern New York Energy Storage project installed and operated by the New York Power Authority connects into the state's electric grid in Chateaugay, NY.

Smart, affordable, and resilient: New York State is investing in energy storage systems to help modernize the electric grid and reduce carbon emissions.

Energy storage at the substation
