---

Quidnet Energy, ENBW, and Peak Energy have energy storage projects in the works in the U.S. A Texas startup has completed a key test for its long-duration ...

Across the United States, battery energy storage is rapidly emerging from a niche technology into mainstream grid infrastructure. The growing attractiveness of battery energy ...

LPO can finance short and long duration energy storage projects to increase flexibility, stability, resilience, and reliability on a renewables-heavy grid.

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

Fears of massive battery fires spark local opposition to energy storage projects 1 of 6 | Facing growing electricity demands partly fueled by AI and warm weather, New York is beginning to ...

In this article, we explore how utilities and developers are approaching the planning, deployment, and integration of grid-level storage systems--and what makes these ...

"After another year of record deployment, energy storage is solidifying its place as a leading solution for strengthening American energy security and grid reliability in a time of ...

3,431 MW/9,188 MWh were deployed in the grid-scale segment, the largest capacity installed in a Q3 on record. Texas and California are responsible for 93% of MW and MWh total capacity.

The CEA mandates co-located ESS (approx. 2 hours) for new solar projects, aiming to reach 60 GW of storage by FY 2032 (including 42 GW of BESS and 19 GW of pumped ...

The plan proposed last week aims to enhance the cross-border sharing of energy between EU Member States and expedite the grid connection and permitting bottlenecks that ...
