Eos's technology is designed for long-duration grid scale stationary battery storage. The batteries can achieve 100% depth of discharge, do not degrade based on age, and are rated for 6,000 ...

Our flagship zinc-powered clean energy storage system. Explore our safe, simple, durable, flexible, and readily available battery technology, which showcases the benefits of ...

Our containerized Eos Cube can fit in almost any site and weather almost any climate, bringing affordable and reliable energy storage to even the harshest, remotest locations.

As renewable sources like solar and wind gain traction, large-scale energy storage capacity is vital for achieving reliability in energy delivery. Eos Energy's innovative systems ...

Our fully-containerized, fully-integrated, "plug-and-power" system. Building maximum capacity--and community support. A market first: indoor storage for urban locations.

It is a reliable alternative to lithium-ion battery technology. The Eos clean energy storage system can be configured to reduce total cost of ownership and maximize profitability in a wide range ...

More than half of Eos' \$12.9 billion project pipeline comes from proposals delivered in 2023, an uptick in volume driven by passage of the Inflation Reduction Act, ...

Commercial & Industrial Eos technology enables its customers to advance their own sustainability, resiliency and low-carbon goals

Eos Cube A containerized BESS solution that fits in almost any site and weathers almost any climate. We
