---

EASE, as the voice of the energy storage industry, is an active contributor of the design of upcoming funding programmes for energy storage research and development and ...

The main energy storage method in the EU is by far "pumped storage hydropower", which works by pumping water into reservoirs when ...

Energy Storage Europe Association is actively shaping the legal and R& D funding framework for energy storage at EU level. Members gain direct ...

EASE supports the deployment of energy storage to enable the cost-effective transition to a resilient, carbon-neutral, and secure energy system.

The communication aims to accelerate the rollout of grids, storage infrastructure and design future-proof electricity network charges. Energy storage can bring benefits that will lower ...

On 27 May 2025, over 200 participants attended the webinar on the "EASE Guidelines on Safety Best Practices for Battery Energy Storage Systems". The Guidelines are designed to support ...

The European Commission has recently launched a stakeholder consultation on its upcoming guidance regarding grid connections in situations where capacity constraints exist. In ...

In Europe, the capacity of renewable energy sources is growing very rapidly, while traditional power plants are slowly being ...

EASE is proud to support the Energy Storage Summit 2025, taking place from 17-19 March in London.

EASE is glad to be a partner of the Energy Storage Coalition, a new organisation aimed at accelerating the decarbonisation of the European energy system by increasing the ...

Energy storage is a key enabler of the European Union's decarbonisation and energy security objectives, yet current grid fee structures often act as barriers to its deployment.

The storage technology of the eligible project must have been used internationally in electricity storage facilities participating in electricity markets, and have been commissioned within 2018 ...
