Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.

What are some options for solar that don't require upfront capital?

In many states, there are numerous options for solar that do not require up-front capital. These include bonds, financial loans, equipment leasing, or third-party financing. Including solar in a guaranteed energy savings contract is also an option.

By executing solar installations on their facilities, schools can promote solar energy, provide students with pathways to energy careers, and yield economic benefits to their local ...

The toolkit includes detailed information about school energy use and the opportunities and limitations of solar projects, provides overviews of varying ownership models available, ...
