Scientists are working to replicate fusion on Earth as a means to generate electricity for the power grid. Fusion energy would provide the benefit of a lasting power source that ...

Commonwealth Fusion Systems is on a mission to deliver the urgent transition to fusion energy, the power source of the sun and other stars, and ARC is how we'll do it.

The goal of ITER is to achieve fusion power production at power plant scale, breaking new ground in fusion science and demonstrating fusion reactor technology.

The paper lays out a detailed roadmap showing that while scientific advances have propelled fusion closer to reality, several technological and economic hurdles remain before ...
