The strategy will see procurements of a combination of so-called "hydrogen-ready" gas power plants, a handful of power plants running on hydrogen from their start of operation, ...

Gotion begins EU-certified mass production of 5 MWh energy storage units at its Gottingen facility in Germany, a former Bosch plant.

Operational since September 2023, Gotion's Gottingen plant, established in July 2021, produces battery packs and energy storage systems. The 5MWh system, manufactured ...

With today's delivery of three battery storage containers, each weighing 44 tonnes, the EEW Group's first battery storage facility has reached a major milestone.

Construction of Germany's largest battery storage facility to date is set to begin in Forderstedt, Saxony-Anhalt, on November 4, 2025.

The new, larger BESS will feature three battery fields across six hectares that will host more than 25,000 lithium ferro-phosphate batteries in 316 shipping containers.

A successful energy transition will require a variety of storage systems to absorb electricity during peak times and release it when needed -- for example in the evening and at night.

While the demand for energy storage is growing across Europe, Germany remains the European lead target market and the first choice for companies seeking to enter this fast-developing ...
