How does 5G work in Latvia?

On board Latvian port service provider LVR Flote's Varma icebreaker ship, the LMT has deployed 5G connectivity that can be delivered as far as 53km from the base station. Pilot boats and floating drones are all part of an intricate system to broadcast seabed measurements and remote video transmissions.

Will 5G help Latvia's border security?

Latvia has recently accused Belarus of letting illegal migrants cross into Latvia. This is an instance where border security, police, and military need to collaborate. Not all of these units would have access to the traditional military "green radio." However, 5G has the potential to simplify coordination and collaboration at the country's borders.

What is 5G territory in Riga?

The 5G Territory event in Riga was developed eight years ago to highlight this expertise and invite big names from the telecoms industry to use Latvia as a national testbed and a playground for technological innovation. He adds the country already has shared its expertise and innovations with the likes of Ukraine and Moldova.

Is 4G a viable alternative to fixed broadband in Latvia?

Indeed, many Latvians eschew a wired broadband connection in their own home in favor of relying on 4G. According to the European Commission, as early as 2017, mobile and fixed services have directly competed, with 4G emerging as an alternative to fixed broadband, particularly in rural areas.

Tele2's recent deployment of 5G technology across 19 base stations in Riga, coupled with the modernization of 4G infrastructure in the Pieriga region to also support 5G, is ...

Bite Latvija aims to provide 5G access to 85 percent of the Latvian population by the end of the year. Meanwhile, 4G is already available to around 99 percent of the population.

Riga, Latvia - Bite Latvija, a leading electronic communications and ICT service provider, is significantly
