It's easy to add lots of these lights around your yard, but how much electricity is it going to use? Below we will discuss and test landscape lighting wattage, explain how to work it out for ...

Wondering what wattage makes a good solar light? Discover the ideal power range for bright, efficient lighting in any outdoor space.

For outdoor solar lighting, a wattage of 1 to 30 watts is often advised. But as mentioned above, there are a number of variables that will determine the optimal wattage.

For instance, an incandescent bulb might use 40 - 100 watts of power, while an LED bulb in a solar garden light might only use 1 - 5 watts. That's a huge difference!

The average wattage of garden solar lights typically ranges from 0.5 to 15 watts. Most solar lights designed for residential gardens are usually between 2 to 10 watts.

For solar garden lights, lumens are critical for determining brightness, with typical lights ranging from 15 to
