How many solar panel companies are there in the US?

Thomas has more than 580 solar panel suppliers across the US. As you can see in the infographic below, these solar panel companies are geographically distributed across the country, with a large majority (174) located in California. Florida follows with 45, then New York with 40, Texas with 35, New Jersey with 34, and 32 in Pennsylvania.

How many solar manufacturing jobs are there in the United States?

Solar manufacturing has created over 33,000 direct jobs across the United States, with significant multiplier effects in local communities. Georgia leads with approximately 8,000 manufacturing jobs, followed by Ohio with 6,500, and Texas with over 5,000 positions across multiple facilities.

Who makes the most solar panels in America?

Module Assembly: This represents the strongest segment of US solar manufacturing, with over 51 GW of annual capacity across dozens of facilities nationwide. First Solar remains America's largest solar manufacturer, specializing in cadmium telluride (CdTe) thin-film technology.

What percentage of solar panels are made in China?

China produces 86% of the world's solar panels each year, according to Germany's Fraunhofer Institute for Solar Energy Systems. In comparison, Europe and North America each produce around 2%. It therefore makes sense that eight of the world's nine largest solar manufacturers are based in China.
