How many wind farms are there in New Zealand?

New Zealand has 21 commercially operating wind farms with a combined capacity of 615 MW. The largest capacity of a single wind turbine in New Zealand is 4.3 MW, situated at the Waipipi wind farm. With 29 wind turbines, it can generate enough electricity to power around 22,000 average New Zealand homes.

How big is a wind turbine in New Zealand?

Turbines range in size from around 1 kW domestic units up to 15 MW which can be seen in prototype offshore wind farms. The largest capacity of a single wind turbine in New Zealand is 4.3 MW, situated at the Waipipi wind farm, which has a collective capacity across the farm of 133 MW.

What percentage of New Zealand's electricity is generated by wind?

Wind power constitutes a small but growing proportion of New Zealand's electricity. As of November 2023, wind power accounts for 1,059 MW of installed capacity and over 6 percent of electricity generated in the country. New Zealand has abundant wind resources.

Does New Zealand have wind power?

Wind power represents a small but increasing share of New Zealand's electricity generation. As of November 2023, it boasts an installed capacity of 1,059 MW, contributing over 6 percent to the country's electricity supply. New Zealand's favorable wind resources, particularly in the Roaring Forties, facilitate this growth.

Aotearoa New Zealand now has 21 fully operational onshore wind farms operating with a total installed capacity of 1,263 MW. They represent over ...

Our dataset for Wind farms in New Zealand is one of the most comprehensive in the industry. As of September, 2025, we have compiled data on 19 verified listings.

This report lists the top New Zealand Wind Energy companies based on the 2023 & 2024 market share reports. Mordor Intelligence expert advisors conducted extensive research and identified ...
