-----  
How much do solar panels cost?

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type, and installer.

How much does a 2 kW solar system cost?

As of January 2022, the average cost of solar in the U.S. is \$2.77 per watt (\$5,540 for a 2-kilowatt system). That means the total 2 kW solar system cost would be \$4,100 after the federal solar tax credit discount (not factoring in any additional state rebates and incentives).

How much does a solar system cost per watt?

Ultimately, many factors figure into the price per watt of a solar system, but the average cost is typically as low as \$2.75 per watt. This price will vary if a project requires special adders like ground mounting, a main panel upgrade, an EV charger, etc.

How much does a 6 kW solar panel installation cost?

The average 6-kW residential solar panel installation is \$17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

A study by the Department of Energy's Lawrence Berkeley ...

Based on our 2025 survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of between 20 and ...

A study by the Department of Energy's Lawrence Berkeley Laboratory found homes with solar panels sold for an average cost of around \$15,000 more than comparable homes ...

A 2kW solar system can generate 2 kilowatts of power under ideal conditions, typically comprising around 5-8 solar panels depending on the efficiency and wattage of the ...
