How much do solar panels cost?
The price per watt for solar panels can range from $2.50 to $3.50and largely depends on the home's geographical area. Residential solar panels are usually sized between 3 kW and 8 kW and can cost anywhere from $7,500 to $28,000 in total installation costs. See average solar panel system costs by size (before tax credits or discounts).

How much does a 10 kW solar system cost?
It costs $36,500for a 10-kW solar system after the ITC is applied. Broadly speaking,the cost is about $18,250 for a 5-kW system. Other solar equipment,higher quality panels,or above-average energy needs will increase the cost. Conversely,a smaller solar panel system or less efficient solar panels will decrease the cost.

How much do Solar shingles cost?
Solar panels are the most popular choice for solar energy,but they are not the only option. If your budget allows,solar shingles cost $4 to $14 per wattand look like traditional roof shingles,blending in better with the surroundings and offering a sleeker alternative to standard solar panels. Are solar panels worth it?
