What is a proinsener solar inverter station?

Proinsener Solar inverter stations are designed and integrated specifically for each project. It is an easily installable and compact product perfect for generating solar power on a large scale. All this allows easy and quick field connection to the medium voltage transforming station (MV), which reduces transport and installation costs.

Which inverter is best for a medium voltage power station?

The Sunny Central UP is our most powerful inverter with up to 4600 kVA and is the heart of the Medium Voltage Power Station. At a voltage of 1500 V DC it allows for significantly higher efficiency in system design. With a variety of options and the new DC-coupling readiness it provides maximum flexibility at minimum size.

Can a containerized Solar System be installed off-grid?

Off-Grid Installers have the answer with a containerized solar system from 3 kW upwards. Systems are fitted in new fully fitted containers either 20 or 40 foot depending on the size required.

Are off-grid solar containers reliable?

Solar equipment is very reliable but occasionally parts may fail so there is a need to monitor and solve any problems. Off-Grid Solar container units guarantee security and reliability and allow the engineering team to complete installations in a few days rather than weeks.
