What is a backup battery system?

Essentially, a backup battery system stores energy that can be used when your primary power source fails. These systems are typically connected to solar panels or the grid, charging during periods of excess power and discharging when needed. **Battery Bank:** This is where the energy is stored.

How does a battery backup switch work?

Transfer Switch: Automatically switches the power supply from the grid to the battery backup during a power outage. To connect your backup battery to your house, you'll need some essential tools: **Circuit Breaker Panel:** A main breaker panel where the battery will connect to your home's electrical system.

How do I connect a backup battery to my house?

To connect your backup battery to your house, you'll need some essential tools: **Circuit Breaker Panel:** A main breaker panel where the battery will connect to your home's electrical system. **Battery System:** The backup battery you've chosen for your home. **Wiring Kit:** Wires to connect the battery to the breaker panel and other parts of the house.
