Huawei doesn't even make EV batteries, you might say -- and you'd be right. But they've been quietly getting serious about battery materials and electrolyte synthesis, signaling ...

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres ...

Huawei has filed a patent detailing a sulfide-based solid-state battery design with energy densities between 180 and 225 Wh/lb, roughly two to three times higher than today's ...

Huawei claims these cells can deliver 400-500 Wh/kg, which is about three times the energy density of current lithium-ion cells used in most EVs today. In theoretical terms, that ...

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra ...

Smartphone giant and EV investor Huawei has challenged CATL and BYD's supremacy by inventing a pioneering new battery that blends an incredible range of up to ...

Smartphone giant and EV investor Huawei has challenged CATL and BYD's supremacy by inventing a pioneering new battery that ...

Huawei claims these cells can deliver 400-500 Wh/kg, which is about three times the energy density of ...

Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with ...
