Gmail uses several signals to decide which messages to automatically mark as important, including: Whom you email, and how often you email them Which emails you open Which ...

No, it's not possible. !important is thought to be an instrument of last resort and as such should be used sparingly. !important ing whole selectors would caricature that idea.

What does !important mean in CSS? Is it available in CSS 2? Where is it supported?

In general, it is possible to override a declaration that has !important by using a rule that also has it and that has higher specificity. However, a declaration in a style attribute has, ...

\$("#elem").css("width", "100px !important"); This does nothing; no width style whatsoever is applied. Is there a jQuery-ish way of applying such a style without having to ...

Add classification labels to your email to indicate that it contains sensitive or important content. For example, if your email contains confidential information, your organization's data policy ...

The use of !important is very import in email creation when inline CSS is the correct answer. It is used in conjunction with @media to change the layout when viewing on different platforms.

Using the !important keyword in CSS is a way to prevent other meddlesome programs from taking liberties to interpret your html/css in a way other than what you want. For example when ...

It's almost never a good idea to use !important. This is bad engineering by the creators of the WordPress template. In viral fashion, it forces users of the template to add their ...
