-----  
What solar projects are coming to the power grid in 2025?

This year, massive solar farms, offshore wind turbines, and grid-scale energy storage systems will join the power grid. Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity. The Oasis de Atacama in Chile will be the world's largest storage-plus-solar project.

Is 5G a global network reaching maturity nowhere?

A Global Network Reaching Maturity Nowhere is 5G's momentum more clearly visible than in North America, where the technology has achieved some of the highest adoption rates in the world. As of year-end 2024, the United States and Canada together account for more than 182 million 5G connections, representing a nearly 20% year-over-year growth rate.

Is 5G a foundational infrastructure for Economic and digital transformation?

The result is a more grounded, more strategic view of 5G as a foundational infrastructure for economic and digital transformation. A Global Network Reaching Maturity Nowhere is 5G's momentum more clearly visible than in North America, where the technology has achieved some of the highest adoption rates in the world.

Is 5G a global inflection point?

By Viet Nguyen, President, 5G Americas As of April 2025, 5G has reached a global inflection point. With more than 2.25 billion connections worldwide, adoption is accelerating at a rate four times faster than 4G during its corresponding growth phase.

The solar container market is poised for significant growth, driven by technological advancements, supportive policies, and ...

Indeed, the reality is that network slicing is growing fast, but its rapid-growth phase has been delayed by a few years because of real ...

This growth is fueled by the increasing need for reliable off-grid power supply and the adoption of portable renewable energy systems, coupled with government initiatives ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity.

Solar-powered 5G infrastructure combines photovoltaic solar panels with fifth-generation wireless telecommunications equipment to create self-sustaining network nodes.

In Q1 2025, China's wind and solar capacity surpassed its thermal (coal and gas) capacity for the first time, supplying nearly 23% of the country's total electricity consumed, up from roughly ...

Clean energy momentum builds as solar and wind outpace global electricity demand growth Solar and wind are now expanding fast enough to meet all new electricity ...

Indeed, the reality is that network slicing is growing fast, but its rapid-growth phase has been delayed by a few years because of real-world practical considerations.

The solar container market is poised for significant growth, driven by technological advancements, supportive policies, and increasing demand for sustainable energy solutions.

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

In order to better serve the coming 5G era, in addition to the large number of base stations and wide coverage, the base stations must have good stability and must ensure uninterrupted ...

The solar container market is projected to reach USD 0.83 billion by 2030 from USD 0.29 billion in 2025, registering a CAGR of 23.8% during the ...
