Will energy storage systems help New York build a self-sustaining industry?

Over \$350 million in New York State incentives have been authorized to accelerate the adoption of energy storage systems in effort of building a self-sustaining industry. Energy storage systems will serve many critical roles to enable New York's clean energy future.

What is the difference between manufacturing and deployment of energy storage systems?

Manufacturing: Projects that manufacture energy storage systems for a variety of residential, commercial, and utility scale clean energy storage end uses. Deployment: Projects that deploy residential, commercial, and utility scale energy storage systems for a variety of clean energy and clean transportation end uses.

What is energy storage system?

**ENERGY STORAGE SYSTEM.** One or more devices, assembled together, capable of storing energy in order to supply electrical energy at a future time, not to include a stand-alone 12- volt car battery or an electric motor vehicle. 4.2 2020 Existing Building Code of New York State Section 306 (Energy Storage Systems)  
**SECTION 306 ENERGY STORAGE SYSTEMS**

Can energy storage systems be located in the same room?

Rooms and other indoor areas containing energy storage systems shall be separated from other areas of the building in accordance with Section 1206.14.4 and Chapter 7 of this code. Energy storage systems shall be permitted to be in the same room as the equipment they support. 1206.11.4 Seismic and structural design.

The adoption of battery energy storage in rural electric cooperatives has had an uptick in recent years, mostly attributed to the tax incentives made available through the IRA, as well as the ...

**INDEPENDENT** definition: 1. not influenced or controlled in any way by other people, events, or things: 2.
