What is a European wind power package?

the Union speech on 13 September 2023, President von der Leyen recognised that the EU wind industry faces a unique mix of challenges and she announced a European wind power package. The objective of the action plan is to support EU companies in the wind sector and improve their competitiveness

What is the European wind power action plan?

This is why, as announced by President von der Leyen in her State of the Union speech last month, the European Commission is today presenting a European Wind Power Action Plan to ensure that the clean energy transition goes hand-in-hand with industrial competitiveness and that wind power continues to be a European success story.

How does the Commission protect the wind sector?

To ensure that the wind sector can operate on a level playing field, the Commission closely monitors possible unfair trade practices which benefit foreign wind manufacturers and will continue to use trade agreements to facilitate access to foreign markets, while promoting the adoption of EU and international standards for the sector.

Should the European wind industry scale up and invest now?

the European wind industry must scale up and invest now to let the EU industry and citizens seize the opportunities of the European Green Deal and decarbonisation efforts worldwide. To make this possible, the industry needs more predic

It is accompanied by a Communication on delivering on the EU's offshore energy ambition, including wind power, following up on the EU Offshore Renewable Energy Strategy adopted ...

New modular designs enable capacity expansion through simple container additions at just \$210/kWh for incremental capacity. These innovations have improved ROI significantly, with ...

Therefore, this European wind power action plan, which builds upon the actions already taken by the
