-----

Colombia's Ministry of Energy and Mines is considering launching tenders for storage co-located with solar and wind farms in La Guajira, a region with high renewable ...

From designing a resilient commercial hybrid solar system for a factory in Peru, to engineering a large-scale containerized energy storage solution for a utility project in Chile, to ...

Colombia's Ministry of Energy and Mines is considering launching tenders for storage co-located with solar and wind farms in La ...

The growth of the Latin America off-grid solar container power system market faces several challenges. High initial capital costs can deter adoption, especially in low-income ...

The installed energy storage capacity in LAC currently reaches 2.5 GW. The region is undergoing a rapid deployment of new power generation capacity based on non ...

Standalone utility-scale projects are providing grid stability across Central America and the Caribbean, while high solar penetration is driving solar-paired projects in Mexico and ...

A new report forecasts that Chile will lead the region in energy storage capacity, followed by Mexico and the Dominican Republic - driven by supportive regulatory frameworks ...

Uruguay's pilot project combines wind power with hydrogen storage - essentially creating "renewable energy canned goods" for cloudy weeks. Private equity firms are throwing ...

Standalone utility-scale projects are targeting grid stability across Central America and the Caribbean, while
