The 150 MW Andasol solar power station is a commercial parabolic trough solar thermal power plant, located in Spain. The Andasol plant uses tanks of molten salt to store captured solar ...

With a focus on harnessing solar, wind, and hydroelectric power, Slovenia aims to transition away from fossil fuels and promote energy independence. The recent investments in solar farms, ...

Discover how photovoltaic power generation and advanced energy storage systems are transforming Slovenia's capital into a hub for clean, cost-effective electricity.

Slovenia's capital city established a public-private partnership for the construction of 51 photovoltaic units on public buildings.

That's exactly what Ljubljana's energy storage power initiative is achieving. Nestled in Slovenia's capital, this project combines cutting-edge battery tech with smart grid ...

Ljubljana's first energy cooperative in Siska District demonstrates how localized microgrids could work. Participants share stored solar power through blockchain-tracked transactions.

Figure 2: Cumulative installed capacity of new energy storage projects commissioned in China (as of the end of June 2023) In the first half of 2023, China's new energy storage continued to ...

Solar and wind power projects with or without energy storage that are on Slovenia's priority list can be submitted for grants from the European Union's Modernisation Fund.

You know, when we flip a light switch in Ljubljana, few realize the complex ballet happening between solar
